Low Angle Accessory
Posted by wickededge - 01 Feb 2012 21:20

Hi all,

I'm testing the new, much anticipated low angle accessory this week. I'm hoping to get a short video put together showing how it works. Please stay tuned for pics and results. Initial results have been very good. I eked out a sweet 8 degrees on my Takeda at home. I'll be looking at achievable angles on different knives, workflow and overall design. I'm hoping to get feedback from you all to steer the design toward completion. Since we're having them machined initially, we can keep the design fairly fluid until we've settled on something that people are really happy with. At that point, we'll make a mold so we can cast it and bring the costs down.

-Clay

+1 for a a new set of jaws as this could be less finicky? I am happy with the Al vices.

Looks cool. Not sure if and when I would need that low of an angle, but it is nice to have the option.

Is there any ETA on this?

"Much anticipated" is right - for a long time

I'm hoping to have it soon. We dialing pricing in now, and hope to have some ready in a couple of weeks.

Please notify me when the accessory is available. I want one.

Thanks,

Clay,

Can we get some 360 pics of the low angle accessory and detail pics of the attachment process?
