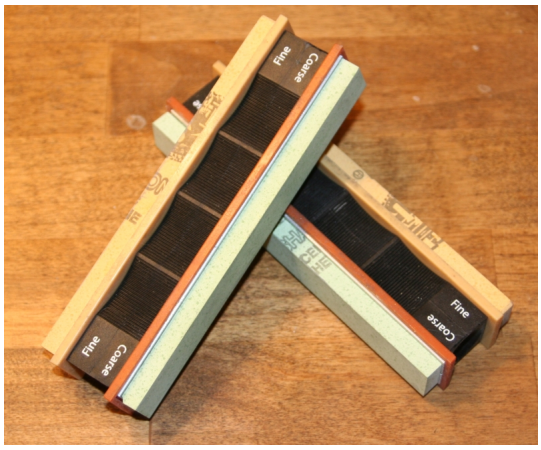
SOLD - Shapton 1K / 2K Paddles

Posted by komitadjie - 26 Jan 2012 23:23

Hey, not sure what the general rule is on here about posting for-sales, but I figured this was probably the place for it!

I've got a set of paddles mounted with Shapton stones, 1K and 2K, which are perfect for cleaning up the scratches and doing a bit more refinement after the 1K diamonds, and before the strops. I've decided that I'm going to stick with an all-diamond progression on my WEPS, and keep my EdgePro as my waterstone unit (since I have to soak those stones anyway).

So, I'm offering up for sale my Shapton paddles, custom-made by Ken Schwartz! They've been used a handful of times, and are lapped clean and flat. I'd like to get $180 for them (I'll pay shipping), which is a tad less than I paid to get into them. Incidentally, I'd be happy to trade for Shaptons for the EP, which is my plan once I shift these anyway. LOVE the stones, just changing my plans a bit.



Paddles are SOLD

Still sitting in the box, I've worked a couple more blades with 'em since the photo, but they are still in tip-top shape.

Hey! I'll have to check and see where they ended up, I was out of town week before last, and I piled up an ASTOUNDING number of emails while I was away. Still sorting through the mess, I suppose I should really devote a bit more time to the backlog. lol

Doing well, been playing around quite a bit more with all of my sharpening stuff, as well as some new photography gear. Clay got me some upgraded swivels a bit ago that made ALL the difference in the WEPS, that double-bevel issue I was having is completely and totally gone. Hella huge difference, overall.

Email is over-rated and often far from being a time saver... more like a time sync.

Just sent you updates on my Kalamazoo efforts. Nothing real important.

Reply if/when you see them.. or don't as the case may be..

☺

Ok, how about dropping the price a bit, then. Say $150?

Hasn't popped up in my inbox yet, I'm keeping an eye out for it. Feel free to Email me if you like, I've had a couple minor issues with PMs not working quite as-planned on here.
