Using The Forums!

Posted by Billabong - 29 Oct 2012 02:23

I have noticed a few people say they can't upload photo's etc.

So perhaps some "how to" info here might be nice.

I have limited knowledge, but will share what I know.

The site uses "bbcode", so each side of your text there are words/letters in brackets to perform each operation.

www.bbcode.org/reference.php

Renamed the link, here.

You can use a word or words instead of the usual url link, so the sentence flows.

Where it says "text" your message goes.

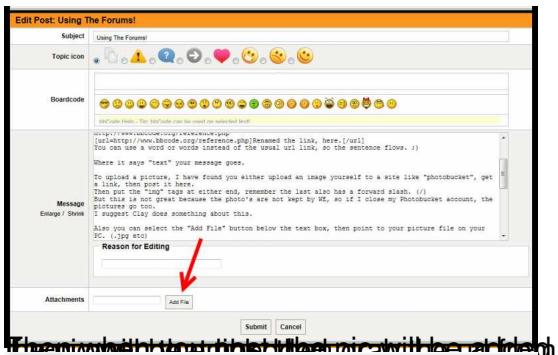
To upload a picture, I have found you either upload an image yourself to a site like "photobucket", get a link, then post it here.

Then put the "img" tags at either end, remember the last also has a forward slash. (/)

But this is not great because the photo's are not kept by WE, so if I close my Photobucket account, the pictures go too.

I suggest Clay does something about this.

Also you can select the "Add File" button below the text box, then point to your picture file on your PC. (.jpg etc)



[illegible] to the WE site, post the link and add the [img] tags either end,

Then untick the attachment box

[illegible] should know that you are pointing to a pic and do the work for [illegible] the forum content by preventing editing of a post after a 24hour

I enter at Resources/Forums then Recent Topics Tab and read the green posts.

Basically I use a favourite link to "Recent Topics".

I tend to bypass the front page.

I'll get better at posting any news to the forum as well. Usually the stuff I post in the news section is not the really interesting stuff, just humdrum business details
