Storage for Wicked Edge
Posted by PaulDavis - 19 Jul 2012 04:40

_____

I have atached some photos of my Wicked Edge Storage system, i have made this from salvage white oak flooring for the main box & draw fronts with Kwila Draw slides & sides with Cedar as the draw bases. All the metal work is stainless steel, Green felt for the base covers i have places silicone gell bages in each draw to keep moisture at bay but will be adding some Zerust tabs to the box for rust prevention. The Wicked Edge Base is Kwila Hardwood. Enjoy

_____

Paul,

That is awesome! Did you make it yourself?

Very nicely done paul! Looks awesome!

I was thinking about purchasing a pelcian 1600 case for my WEPS. I have it all drawn out with how everything will fit and I think it will be perfect. However I am not sure if it will fit once I put the riser on it that isn't out yet. Clay I was wondering if you could tell me the height of the clamp with the riser attachment that will be coming out.

Thanks guys and as always you are all the best!

The riser adds 1" in height to the sharpener so that overall, it's 5.5" tall, not including the base.

Wow, just saw this, and thought it needs bumped to the top of the pile, that's a very pretty case.

I wonder if he'd consider making them for sale?

ponders

_____

Yeah, that is nice storage piece and it also substitutes as a stand for those who have very low table tops. Nice one, Paul!
