# Purchasing leather, kangaroo, nano separately :

Posted by WayneNicklin - 12 Sep 2012 18:11

_____

I would like to purchase ether leather, kangaroo, nano and balsa separately. I seem to be accumulating a number of handles and don't really need more at this point. Also I would rather do my own mounting on the WEPs handles. With these flimsy materials I would rather first mount borosilicate glass to the handles and then mount the Stropping materials. I do not like how they are currently mounted. Too many waves in the plastic platens. By mounting on the glass I get significantly better results.

_____

Go to Oldawan-Bob Nash's web site. He has kangaroo and nano cloth on aluminum platens to fitted to the handles. No secret

_____

Also on glass as well as blank leather and balsa (though I am currently sold out of glass mounted roo). We can put them together however you want them or send them out without handles.
