Does anybody know how much it costs to buy the upgrade (new vice and arms) for the basic and pro pack 1 kits? And does anybody know when they will be available for purchase?

Pleasure, now about those Karma + & - buttons below our names.

Or the "Thank You" button below a post.

Did anyone answer the compatibility question by ARES? I presume it is, but since I don't have one on hand I wouldn't know for sure?
