Should I get new ball joint arms?
Posted by RICKLINDSEY - 19 Oct 2012 19:53

I keep hearing about people getting new ball joint arms.(due to problem with the old ones maybe?)

I have a F&S. Is there some reason I should get them too? Or am I missing something?

Thanks in advance...

for example it occurs to me that now that we can hone our edges to a mirror polish, perhaps there is a way to inscribe fancy writing or designs in the little tiny edge shoulder that can only be seen with a microscope. I seem to recall seeing something somewhere where artists were writing and drawing on things like rice kernels for example.

That's a good one!!!!

They laser inscribe diamonds with serial numbers. The number is legible with 10x scope.

Would work fine on an edge until you sharpen it once.

Inscribing you name on the spine might be more practical.

Maybe we could insribe the Constitution on the edge in micro script...

Nah, that would be more evidence of our OCD tendencies, and we'd nitpick the heck out of each other's hand writing skills....
