Using The Forums!

Posted by Billabong - 29 Oct 2012 02:23

I have noticed a few people say they can't upload photo's etc.

So perhaps some "how to" info here might be nice.

I have limited knowledge, but will share what I know.

The site uses "bbcode", so each side of your text there are words/letters in brackets to perform each operation.

www.bbcode.org/reference.php

Renamed the link, here.

You can use a word or words instead of the usual url link, so the sentence flows.

Where it says "text" your message goes.

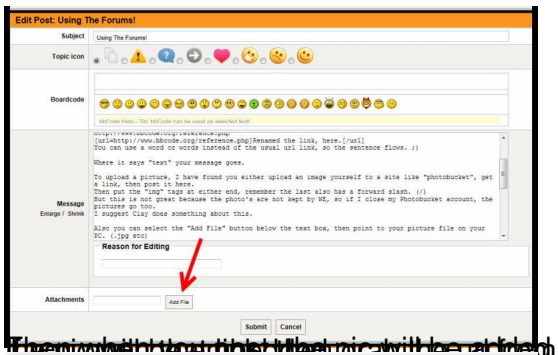
To upload a picture, I have found you either upload an image yourself to a site like "photobucket", get a link, then post it here.

Then put the "img" tags at either end, remember the last also has a forward slash. (/)

But this is not great because the photo's are not kept by WE, so if I close my Photobucket account, the pictures go too.

I suggest Clay does something about this.

Also you can select the "Add File" button below the text box, then point to your picture file on your PC. (.jpg etc)



[illegible] your browser, post the link and add the [img] tags either end,

Then untick the attachment box

[illegible] should know that you are pointing to a pic and do the work for [illegible] the forum content by preventing editing of a post after a 24hour

Now... if I could just post photos from my ipad...

(and iphone, and android phone, and....)

But seriously, iPad would be nice.

Compatibility Mode doesn't seem avail. in the tablet version (or whatever it's called) of IE 10. Switching it in desktop mode, doesn't seem to affect the tablet version.

Good gawd... I've got too many browsers open now...

Does IE 10 have such a feature...compatibility mode ?

Phil

Sure does Phil, and that is a temporary solution.

Well done!

When I set compatibility mode for a website, it remembers it. At least that means you do not have to remember to make the change each time. Of course, when I change machines... and forget to click the icon, it tends piss me off. Totally my fault though

Easy to do cbw!

I upload my photos to Photobucket (free account), then use their (Photobucket) iPad app to grab a link I can then paste in the forums.

Of course a pic included!

It's an iPad screengrab, only out of focus because of the link options.

Do you have a "Surface" or are you running a simulation somwhow?

WAY OT I know...but I am curious.

Phil

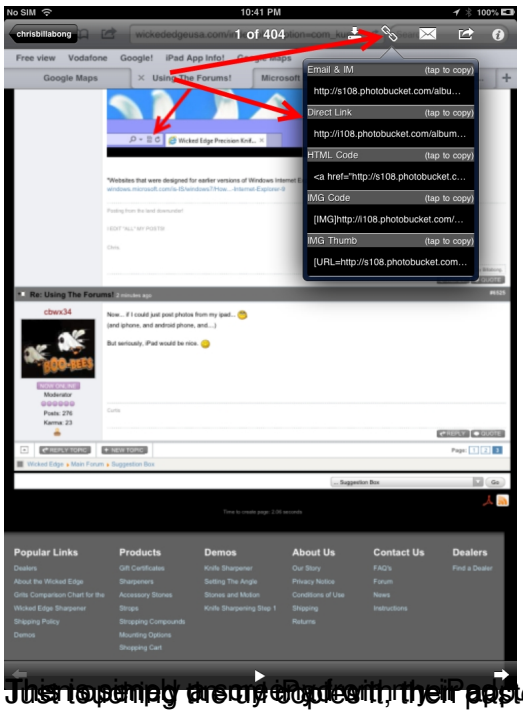
_____

I will try again, a pic!



Just to bring it to my request, then paste in the forum (cbwx34)

No surface... just the version you can download to a "regular" computer, that has the desktop and tablet modes.

Chris... what is that a picture from? Nevermind, I saw it at the bottom.

A bit busy, another, clearer!

Edit - Perhaps a tutorial?

www.ngmocogames.com/threads/281-Tutorial...Photobucket-for-iPad

Just found out .png files fail.

_____

now I'm trying an Android phone, and I think it works!

Edit: well it would, except the files too big

Haha. Success from a phone.

Edit: I should add... an Android phone using a Chrome browser.

(Now I'm not sure why it posted twice... but I guess I better move on.)

Hey!

Great stuff!
