Backlog uodate

I am sure I am not the only one going a bit nuts counting the hours until I get my WEPS which is not due until Sept. It would be great if there was some sort of automated sytem one coud sign into to determine due date or get an update without plaguing the staff with individual emails.

I was thinking of making a youtube of me singing "I want my WEPS" to the tune I want my MTV... but my dog starts barking and whining everytime I sing. Maybe I'll hum with the lyrics printed out.

#2271 here...

I think it's a ploy to order more paddles! I already added the ceramics to my WEPS!

It'll be worth the wait.

I'm 2169 and haven't recieved any email...

Of course I did note in my order to hold my order and ship it complete, meaning the missing ceramics.

I do hope that means pack my order and leave it open till the missing part arrives as oposed to ship all

other inventory and move me to the end of the stack.

Of course that is just CRAZY Paranoid talk.

Clay, do you know what order number you'll be reaching with this batch?

My apologies for quoting you, but once it's online, its out here forever!

Did #2271 make it under the wire (burr perhaps in this arena)? I got a weekend in the woods coming up in Oct and I want to see how a really sharp skinning knife works compared to just a sharp one.

LOL, also just bought two mosin-nagents complete with bayonets... never sharpened a bayonet before....

Let’s go hunting. Fix Bayonets! As a former Marine, that gave me a laugh. But you know…my grandfather shot a boar that then rushed him and gave him a nasty wound before he managed to butt stroke it and then finish it with another round (he had a bolt action 8mm). So maybe bayonets should be standard hunting gear whenever you are hunting boar, bear, or anything that might rush you.

How 'bout one of those under-barrel 'masterkey' shotguns? That'd make a rather awesome charge-stopper loaded with double-aught, I'd think.
