Hello from Puerto Rico.....

Posted by JoseFuste - 26 Jan 2013 09:51

Just ordered last week....In backorder for the next 3 to 4 weeks....

I just got the Lansky and the Sharpmaker and really preferred the second one. I just got very nice results with it and really sharp edges. Also trying to learn more about freehand which is hard and tricky. Anyway, I'm really amazed by the WE so I can't wait to get it.....

He Jose,

Welcome! Nice to see we're from all over the world. I'm from Europe (the Netherlands) myself.

I love the Sharpmaker and still have it, even though the WEPS is a far more advanced piece of engineering. You'll love the WEPS! (Yes it is worth the wait).

Welcome to the forum.

Guided sharpening can help with your freehand sharpening endeavors. Not only do you learn what makes a knife sharp, while eliminating the hardest part of sharpening (holding a consistent angle), but you establish a nice bevel to follow freehand.

Have fun!

Welcome aboard, Jose! The WEPS is well worth the wait - think of it as Christmas in February!
