Is this site slow for anyone else?
Posted by cbwx34 - 16 Feb 2013 16:44

Just curious if its on my end or what. Seems like most times I click on something, I have to wait a looooooooooong time for it to appear. Not everytime, but more often than not. Sometimes it's painful. Been that way for a couple weeks now.

Anyone else seeing this? I've eliminated that it's the computer (tried different) my internet (tried different), so wonder what the deal is.

Does the migration to new server require the site being down?

If so, any idea what the hours may be, roughly speaking?

Thanks in advance from one of your insomniac members.

From what I understand, the site has been cloned to the new server and the only thing that's left is the DNS which should happen in the early morning hours.

_____

It's still slow for the moment since the migration to the dedicated server hasn't been completed. They were missing some piece of information which they now have, so I think it will take place in the early hours tomorrow.

Open your eyes, Curtis!

If I read the error messages, it might due to something we pm-ed about this week: I've got topic subscription on by default, you've got it off.

_____

We're on the new server now, not the smoothest migration to be sure. I'd love to hear back from people regarding the speed of the site now.
