Any news of Pro Pack 2 upgrades?

Posted by ScottSherman - 08 Sep 2012 21:19

At the risk of sounding like a nag, and possibly upsetting someone, I can't help but wonder if there has been any news regarding the new arms or any of the other Pro Pack 2 upgrades. I read a post from Clay about a week or so ago that he was expecting prototypes of new arms and other upgrades, but haven't heard anything since. I know he is busy and working as hard as he can to get this new product out to users. I would just like to know of any progress or even lack of progress. Has anyone spoken to anyone at WE to see if the new parts were up to spec and ready to be mss produced and delivered to the many customers waiting so see them? I thought I would just post this here instead of calling WE. I am guessing that others may have already bugged them by phone for info.

I believe I am asking what others also want to ask or are wondering about. Any word on how far out delivery might be for new and upgrading customers? Perhaps it would could be possible for Clay or his staff to post weekly or semi weekly updates. I am a bit surprised that there isn't more info on the website since they are actually offering these new arms and products for sale by phone.

Thanks Clay,

just to make sure I understand correctly, they will probably be shipped somewhere next time from TW/CN?

How long does it take to get to you? The shipping TW/CN to Germany takes about 3 weeks.

If I calculate corectly it will be in the US mid next month or maybe a bit later correct?

Just curious since I (as some other also said) need to know when I need to pay that big bucks

Can you put me on the waiting list so I won't have to wait 2 more months until since I did register too late ;=)

They're just coming from our factory in Vermont, so they should't take too long to get here. If the samples come in today, I should be able to approve them and get them underway. If that's the case, the lot should be arriving at the end of next week.

Ah, dass ok, die then I messed it up with Cold steel. They then produce in TW....

Thanks for the Time frame!

_____

And I know, I know, I know, I know, I know, I want the new arms.

Good news!
